FLUTTER DEVELOPER

Experienced Flutter developer deeply committed to crafting efficient and innovative solutions. With a demonstrated history of delivering top-tier software promptly, I thrive in collaborative team environments. My dedication to continuous learning ensures I stay at the forefront of emerging technologies, driving ongoing improvement. For further insights into my work, please visit my GitHub and portfolio.

EXPERIENCE

FIRST LOGIC META LAB | PERINTHALMANNA,MALAPPURAM   2023 - Present
Flutter Developer

Developed a basic flutter app as a part of client project, showcasing knowledge of flutter's widgets and layouts, Collaborated with peers on a team projects creating a functional mobile app with flutter and integrated APIs.

PROJECTS

MY VAHAN

As a key contributor to the development of Vahan, a comprehensive project comprising three user-friendly applications and two web applications, I facilitated streamlined services including easy booking of automotive services, seamless vehicle transactions, and hassle-free buying and selling of both vehicles and accessories. This project significantly enhanced the user experience within the automotive industry

OWA

As an integral part of the Owa project, I played a pivotal role in spearheading the digitalization of product warranties and claims, thereby streamlining the entire process. This initiative brought about increased efficiency and transparency, leading to an enhanced customer experience and improved operational effectiveness within the company.

INVENTORY MANAGEMENT

As a software developer, I successfully contributed to an inventory management project, creating a user-friendly application compatible with Android, iOS, tablets, and web platforms. My role involved designing and implementing features that improved inventory tracking, order processing, and overall system efficiency. I collaborated with cross-functional teams, conducted testing, and ensured seamless integration into existing workflows. Through my work, I delivered a versatile app that streamlined inventory processes across various devices.

RESTAURANT APPLICATION

Developed a restaurant finder app enabling users to search for nearby eateries based on location and preferences. Leveraged APIs for data retrieval and implemented user location services

EDUCATION

Calicut University (2020 - 2023)
Bachelor of Computer Application (BCA)

KERALA BOARD OF HIGHER SECONDARY EDUCATION (2018 - 2020)
Computer Application (+2)

TECHNICAL PROFICIENCIES

Dart Flutter Firebase GCP State management
Widget creation and customization
Testing (unit and widget tests) HTML CSS Javascript
Word Excel REST Api's Riverpod Providers

SOFT SKILLS

Teamwork	**Time Management**
Communication	**Empathy**
Adaptability	**Attention to Detail**
